

COMPARISON OF Final gas consumption, 2030 energy savings and Russian imports

An analysis by Stefan Scheuer Consulting shows that 40% energy end use savings could reduce gas use for heat in an amount comparable to the EU's gas imports from Russia.

Stefan Scheuer Consulting is a management consultancy, developing and implementing training and advice on environmental and energy policies and EU public affairs. Its objective is to support public interests in a transparent way to achieve change on the ground for people and their environment.
